

Archive-It

Subscription web archiving service

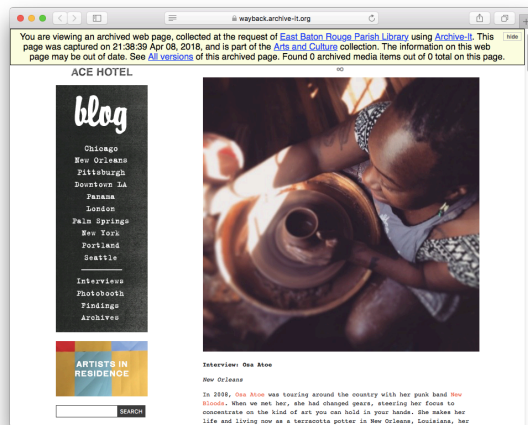

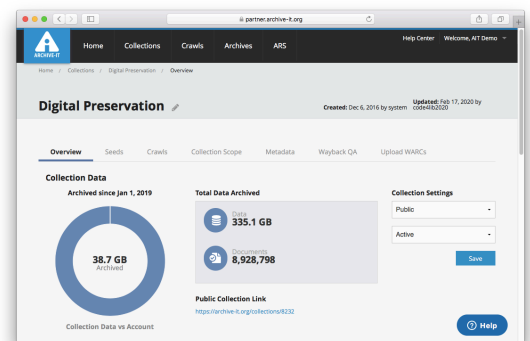

Collect, preserve, and share web archives at scale

Archive-It is the leading web archiving solution, developed by the [Internet Archive](#) for a wide range of organizations, including academic, federal, state or local libraries, archives, and other cultural heritage institutions. Since its launch in 2006, more than 700 partner organizations have used Archive-It's end-to-end hosted solution to create, store, and provide access to collections of web content. **Features include:**

Curator tools: Access your account anytime through a web browser. Automate the Internet Archive's collecting tools to archive websites, pages, and social media feeds.

Storage: Primary and backup copies stored in the international standard WARC preservation format at the Internet Archive's data centers. Receive additional copies on disk or anytime via Archive-It's APIs.

Access: Built-in discovery by URL and full-text search. Add, import, and export descriptive metadata. Public access via [archive-it.org](#) and tools for custom portals.

Support: In-depth tutorials, documentation, and direct technical support from the Internet Archive's professional web archivists and engineers.
