Overview

Build and share archived collections of websites, social media, and other important web documents and materials with Archive-It Pro, a web archiving service of the Internet Archive. Archive-It's suite of innovative archiving and access tools have been used by over 800 library, university, government, non-profit, and knowledge organizations from around the world.

The flagship Archive-It Pro Service includes a full-featured, web-based application for digital collection building, management, preservation, and public accessibility via archive-it.org. The subscription allows for continuous collecting throughout the course of a calendar year and can be renewed annually.

Features

Tools
A powerful, easy-to-use web application to manage and automate archiving tasks using specialized tools to collect websites, webpages, files, and social media feeds.
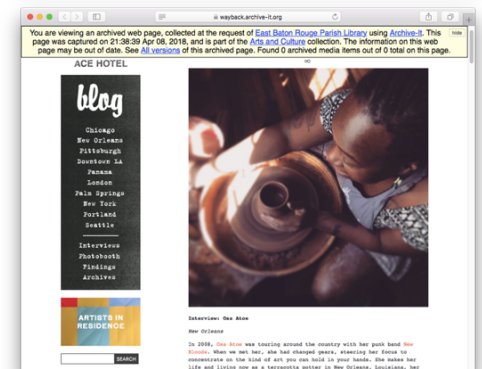

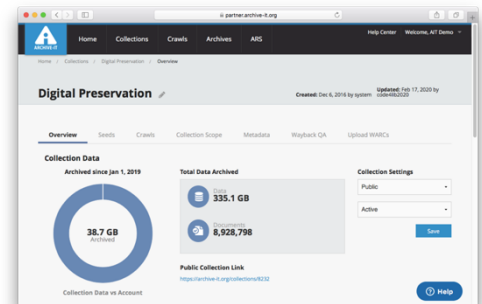

Storage
Multiple copies of your archived data are stored securely at the Internet Archive's independent data centers and are available for download at any time.

Access
Share your collections publicly via archive-it.org, the Wayback Machine, or privately with select users. Archive-It also has tools for integrating archives with live websites or other online collections.

Support
We provide unlimited support, including an extensive knowledge center with in-depth tutorials, videos, online training sessions, and on-demand tech support from our team of web archivists and technologists.

Archive-It Pro Pricing

Subscription cost is based on the amount of data archived annually. We support subscriptions ranging from a few hundred to many thousands of dollars per year and work directly with users to evaluate their needs and subscription costs.
